

KUUBE

2024

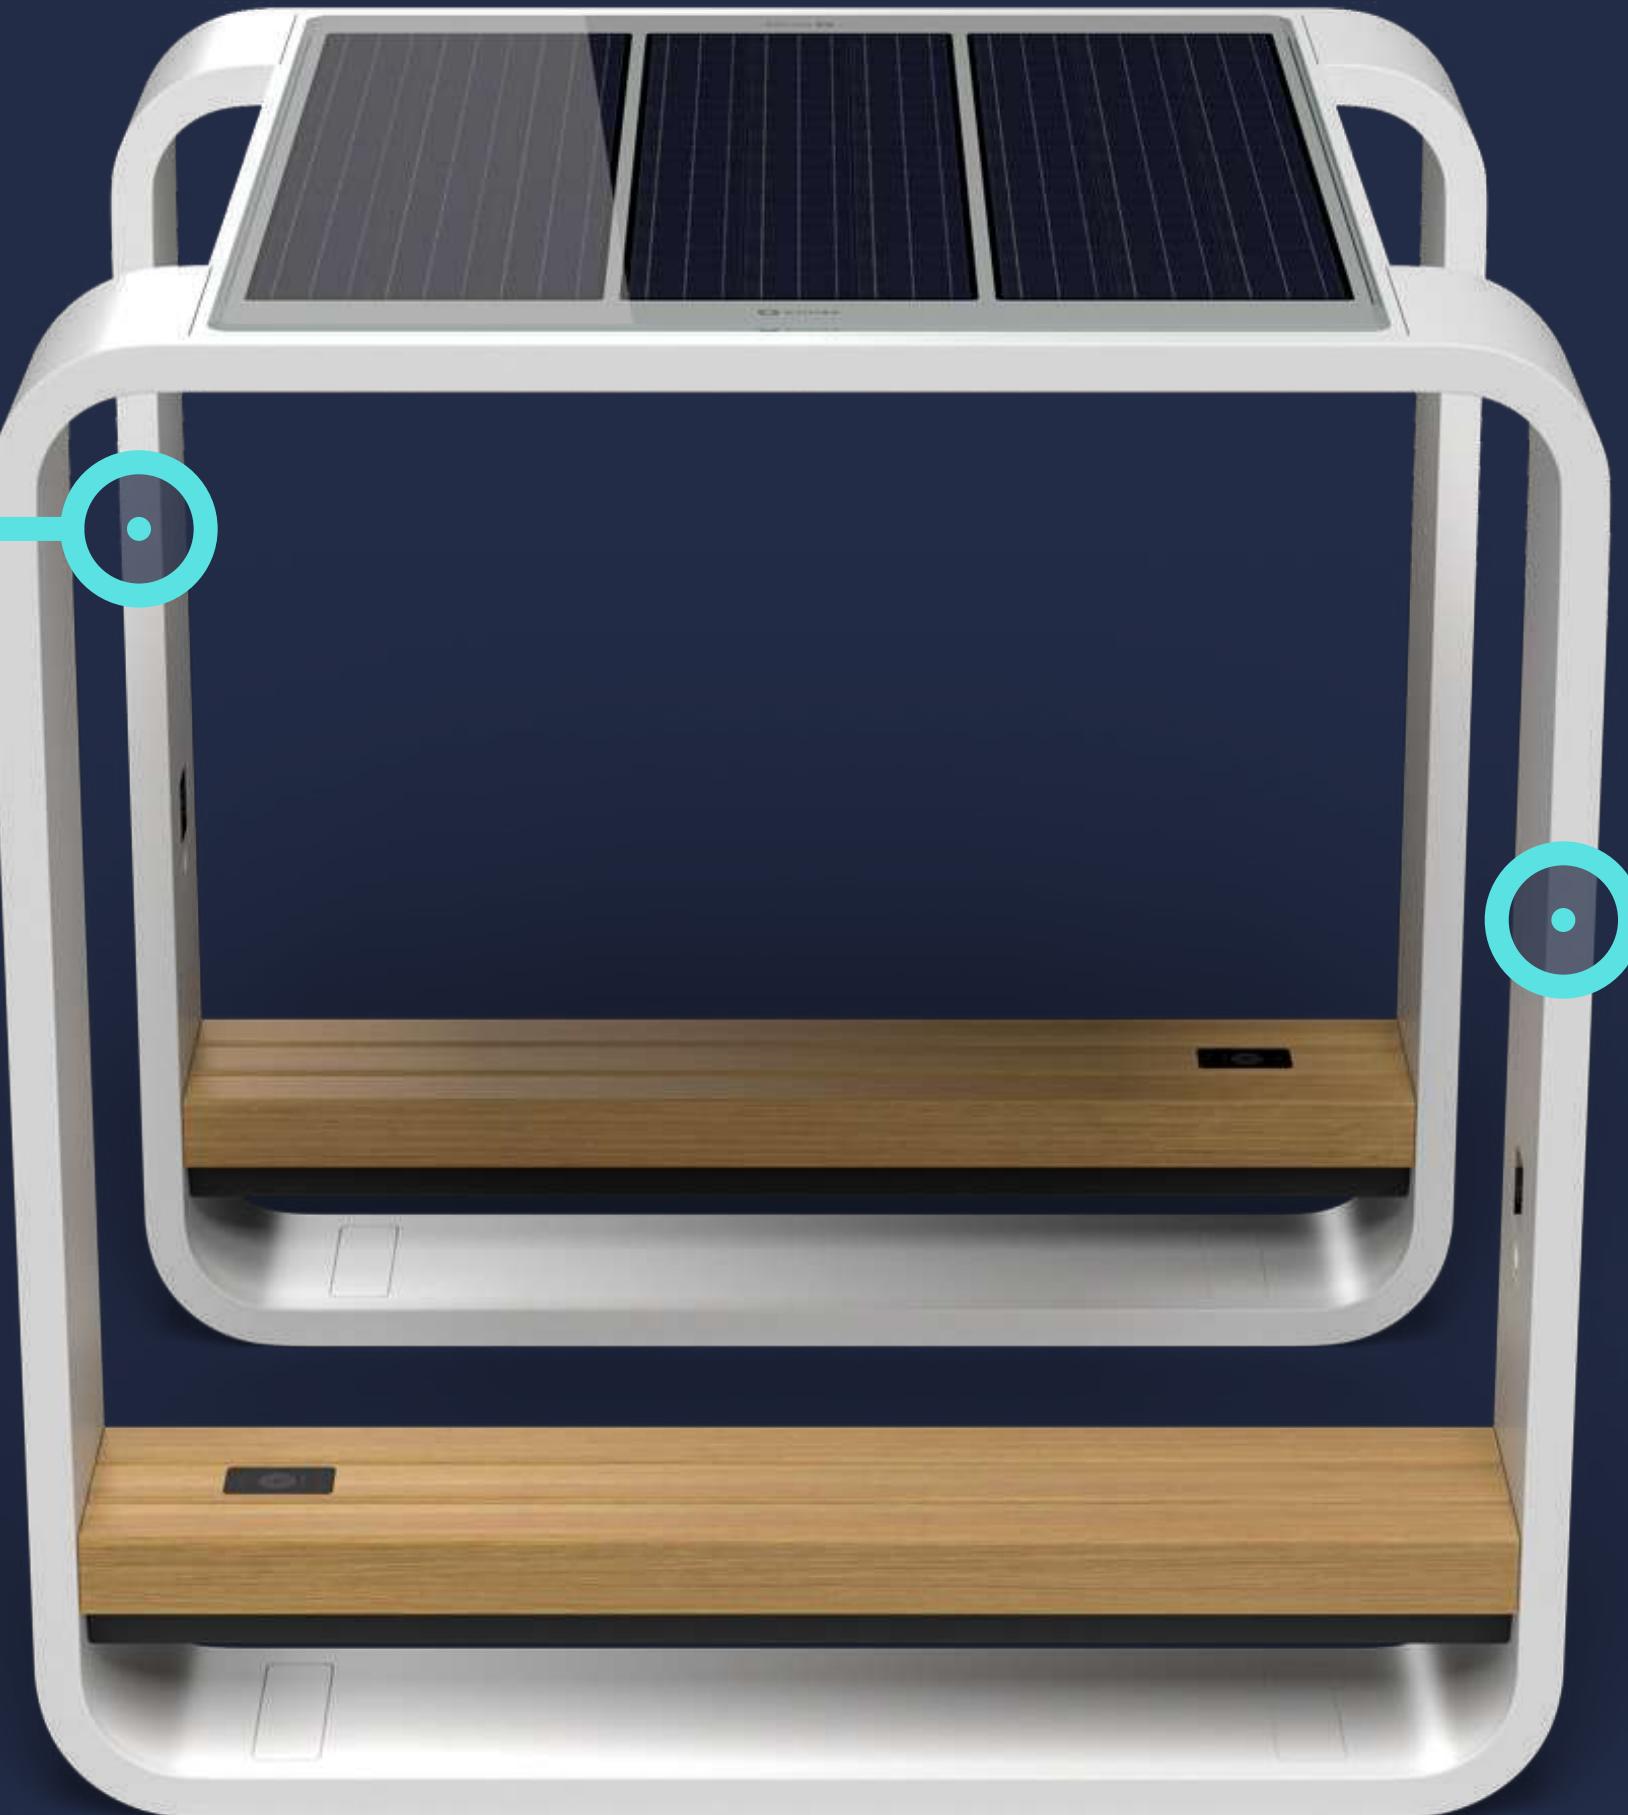

WHAT KUUBE REPRESENTS?

Sustainability & Innovation

Visible example of digital transformation and renewables:

- meeting point for the locals
- extended marketing possibility
- downloadable data to ESG report
- premium hardened materials

 KUUBE

Available features:

- rescued old car batteries
- disinfectant layer
- anti-graffiti layer
- anti-pollution coating
- reused textile waste
- lifelong warranty and maintenance with monthly operation subscription (3 years guaranteed)

INNOVATIONS AND THE DATA BEHIND

The Resysten hygiene coating technology is creating an uninhabitable condition for biological contaminant to survive. Effective for 12 months.

With 1 Kuube Plus, the Clean Air Resysten layer absorbs and decompose up to ~1800 mg a day, 657000 mg a year of nitrogen oxides. It is equal of the emission of a daily/annual use of family car.

32 kg's of textile waste is recycled with the seatings on 1 Kuube Plus.

Kuube green energy generated:
~4800 watts/day; 1000-1500 kWh/year with 1 Kuube Plus
~1000 watts/day; 200-380 kWh/year with 1 Kuube Nano
~600 watts/day; 160-200 kWh/year with 1 Kuube Eco

UPCOMING PRODUCTS

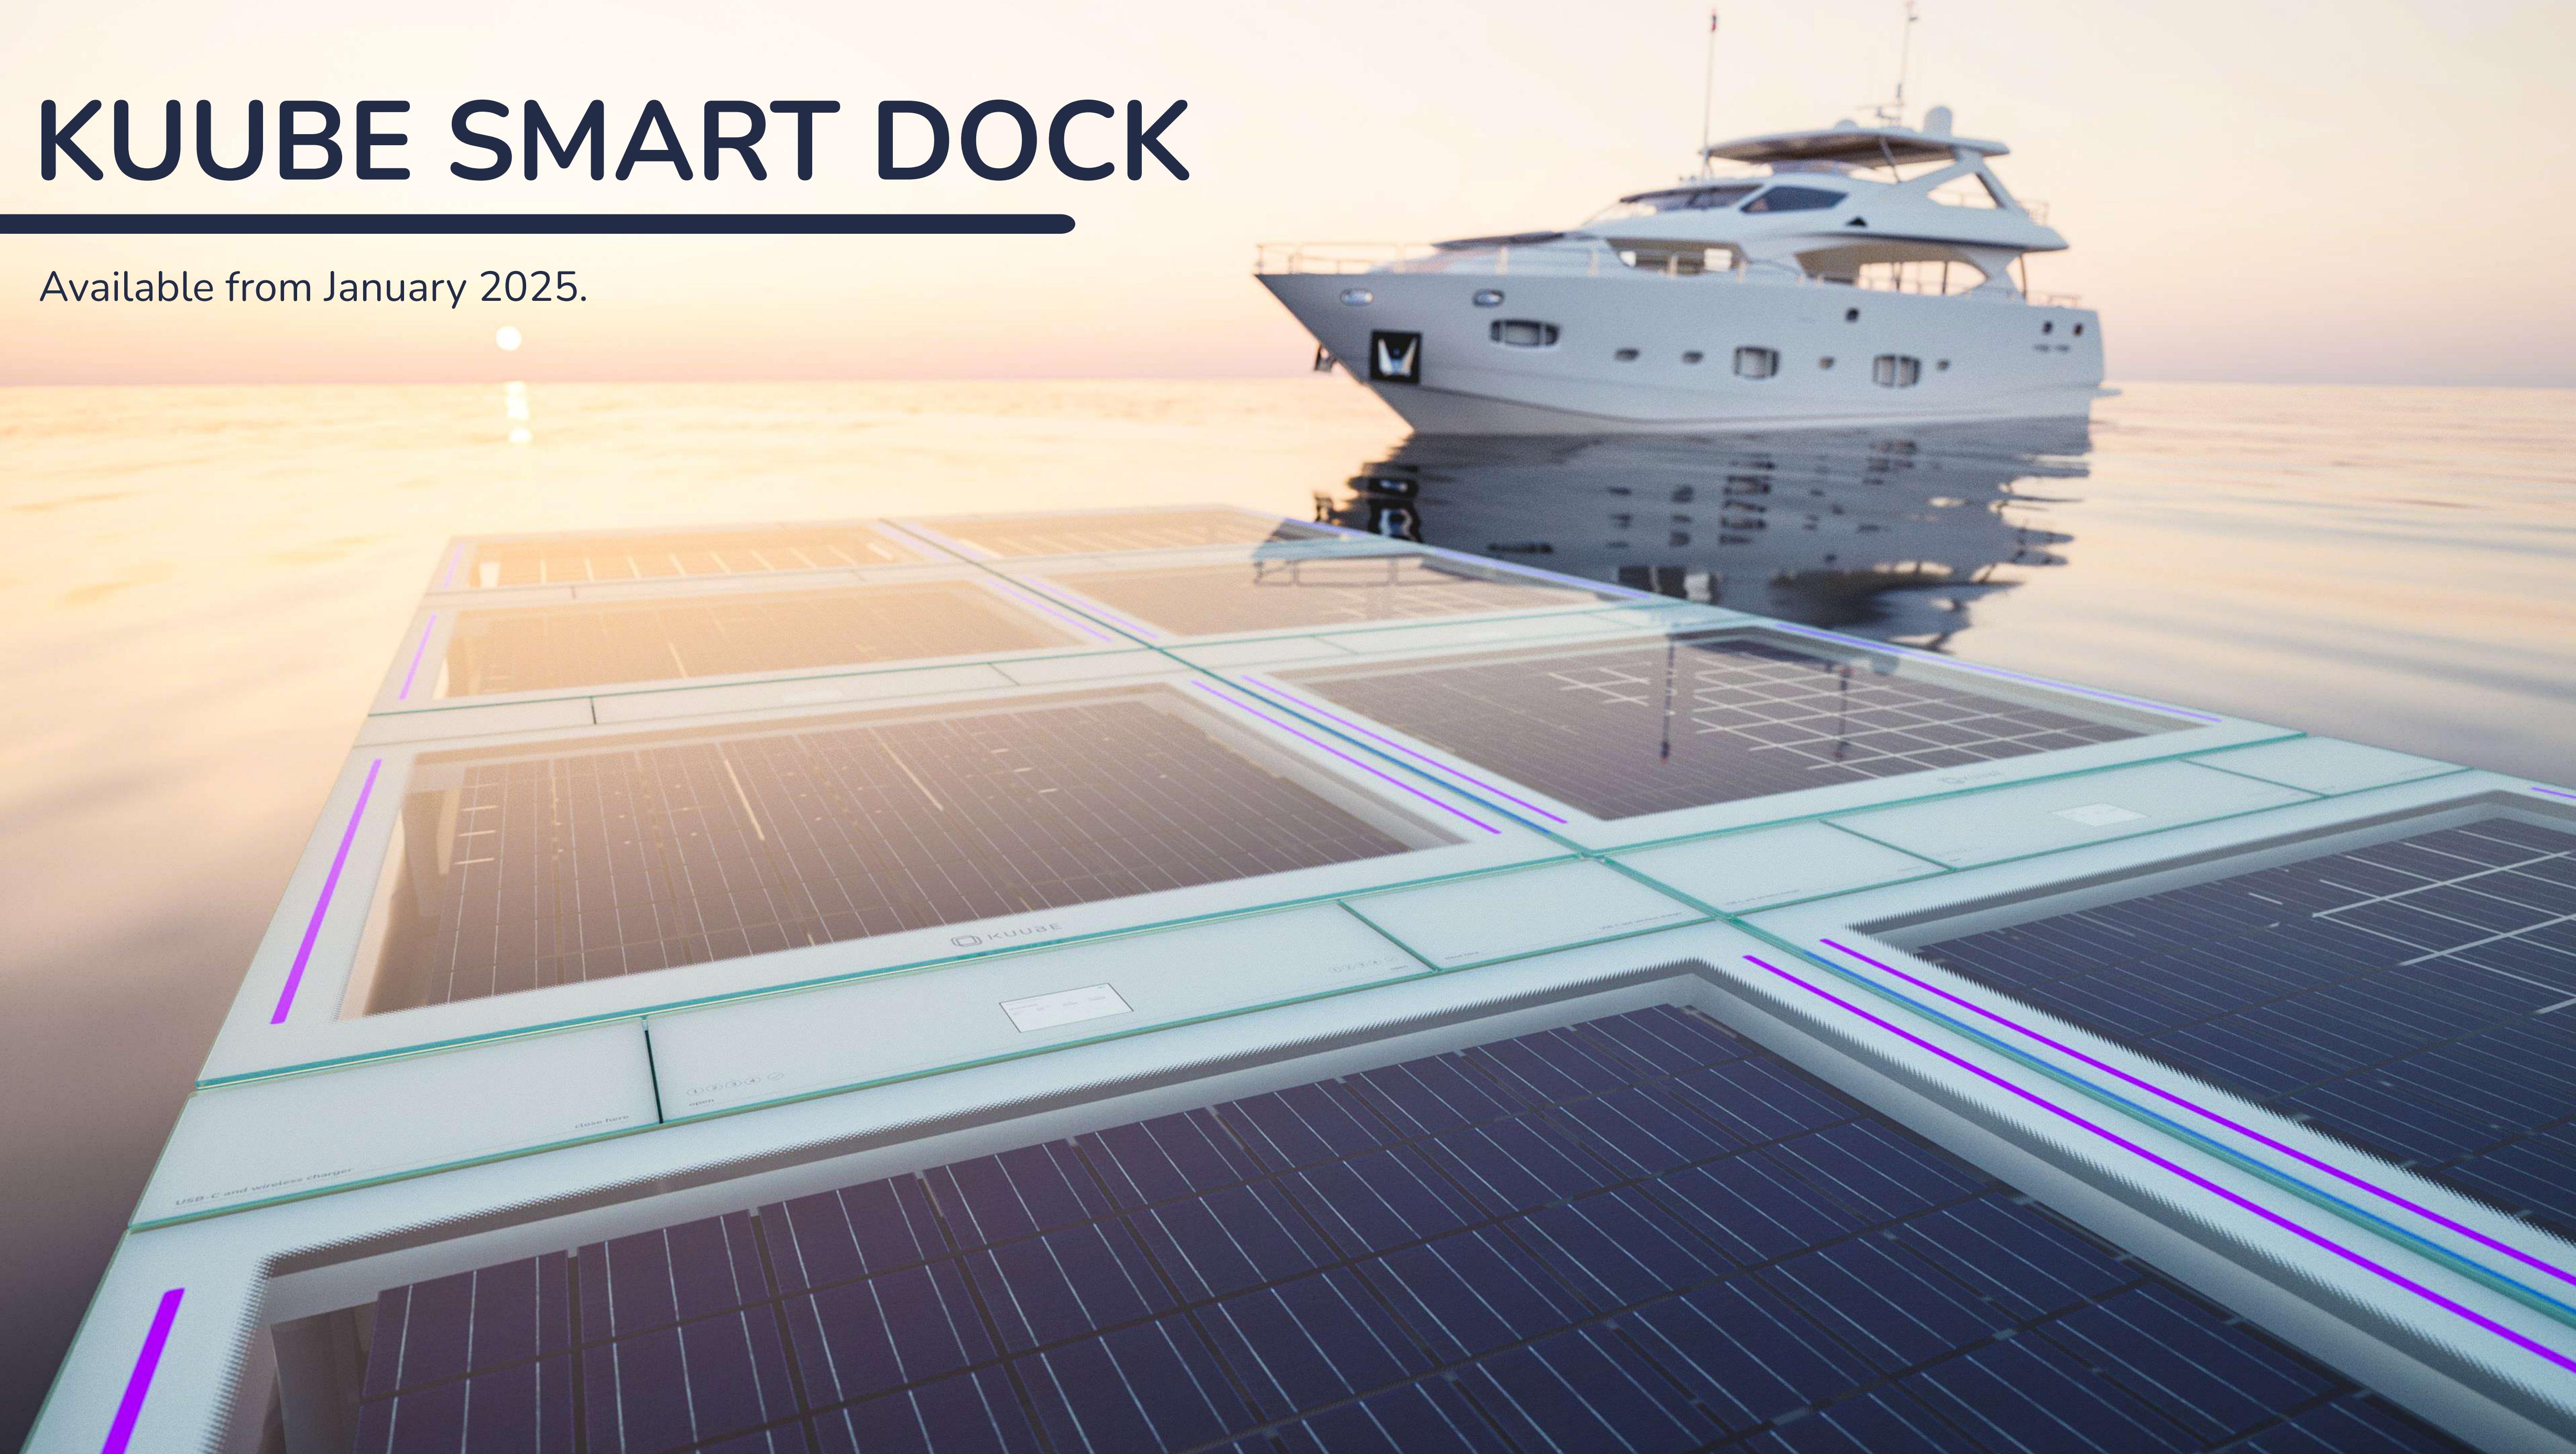

Available from July 2024.

**KUUBE
STOP**

KUUBE SMART DOCK

Available from January 2025.
