

KUUBE

2024

WHAT'S COMING?

Sustainability & Innovation

SOME OF OUR NEW INNOVATIVE PARTNERS

The invisible disinfectant protective coating:
Resysten hygiene coating technology binds at a molecular level to any surface, creating uninhabitable conditions for biological contaminants to survive. Effective up to 12 months.

Clean Air Resysten can absorb up to 222mg a day of nitrogen oxides from one sqm of exterior coated surface. To put it in a perspective, each of our Plus benches will be able to absorb a cars daily nitrogen oxide emission.

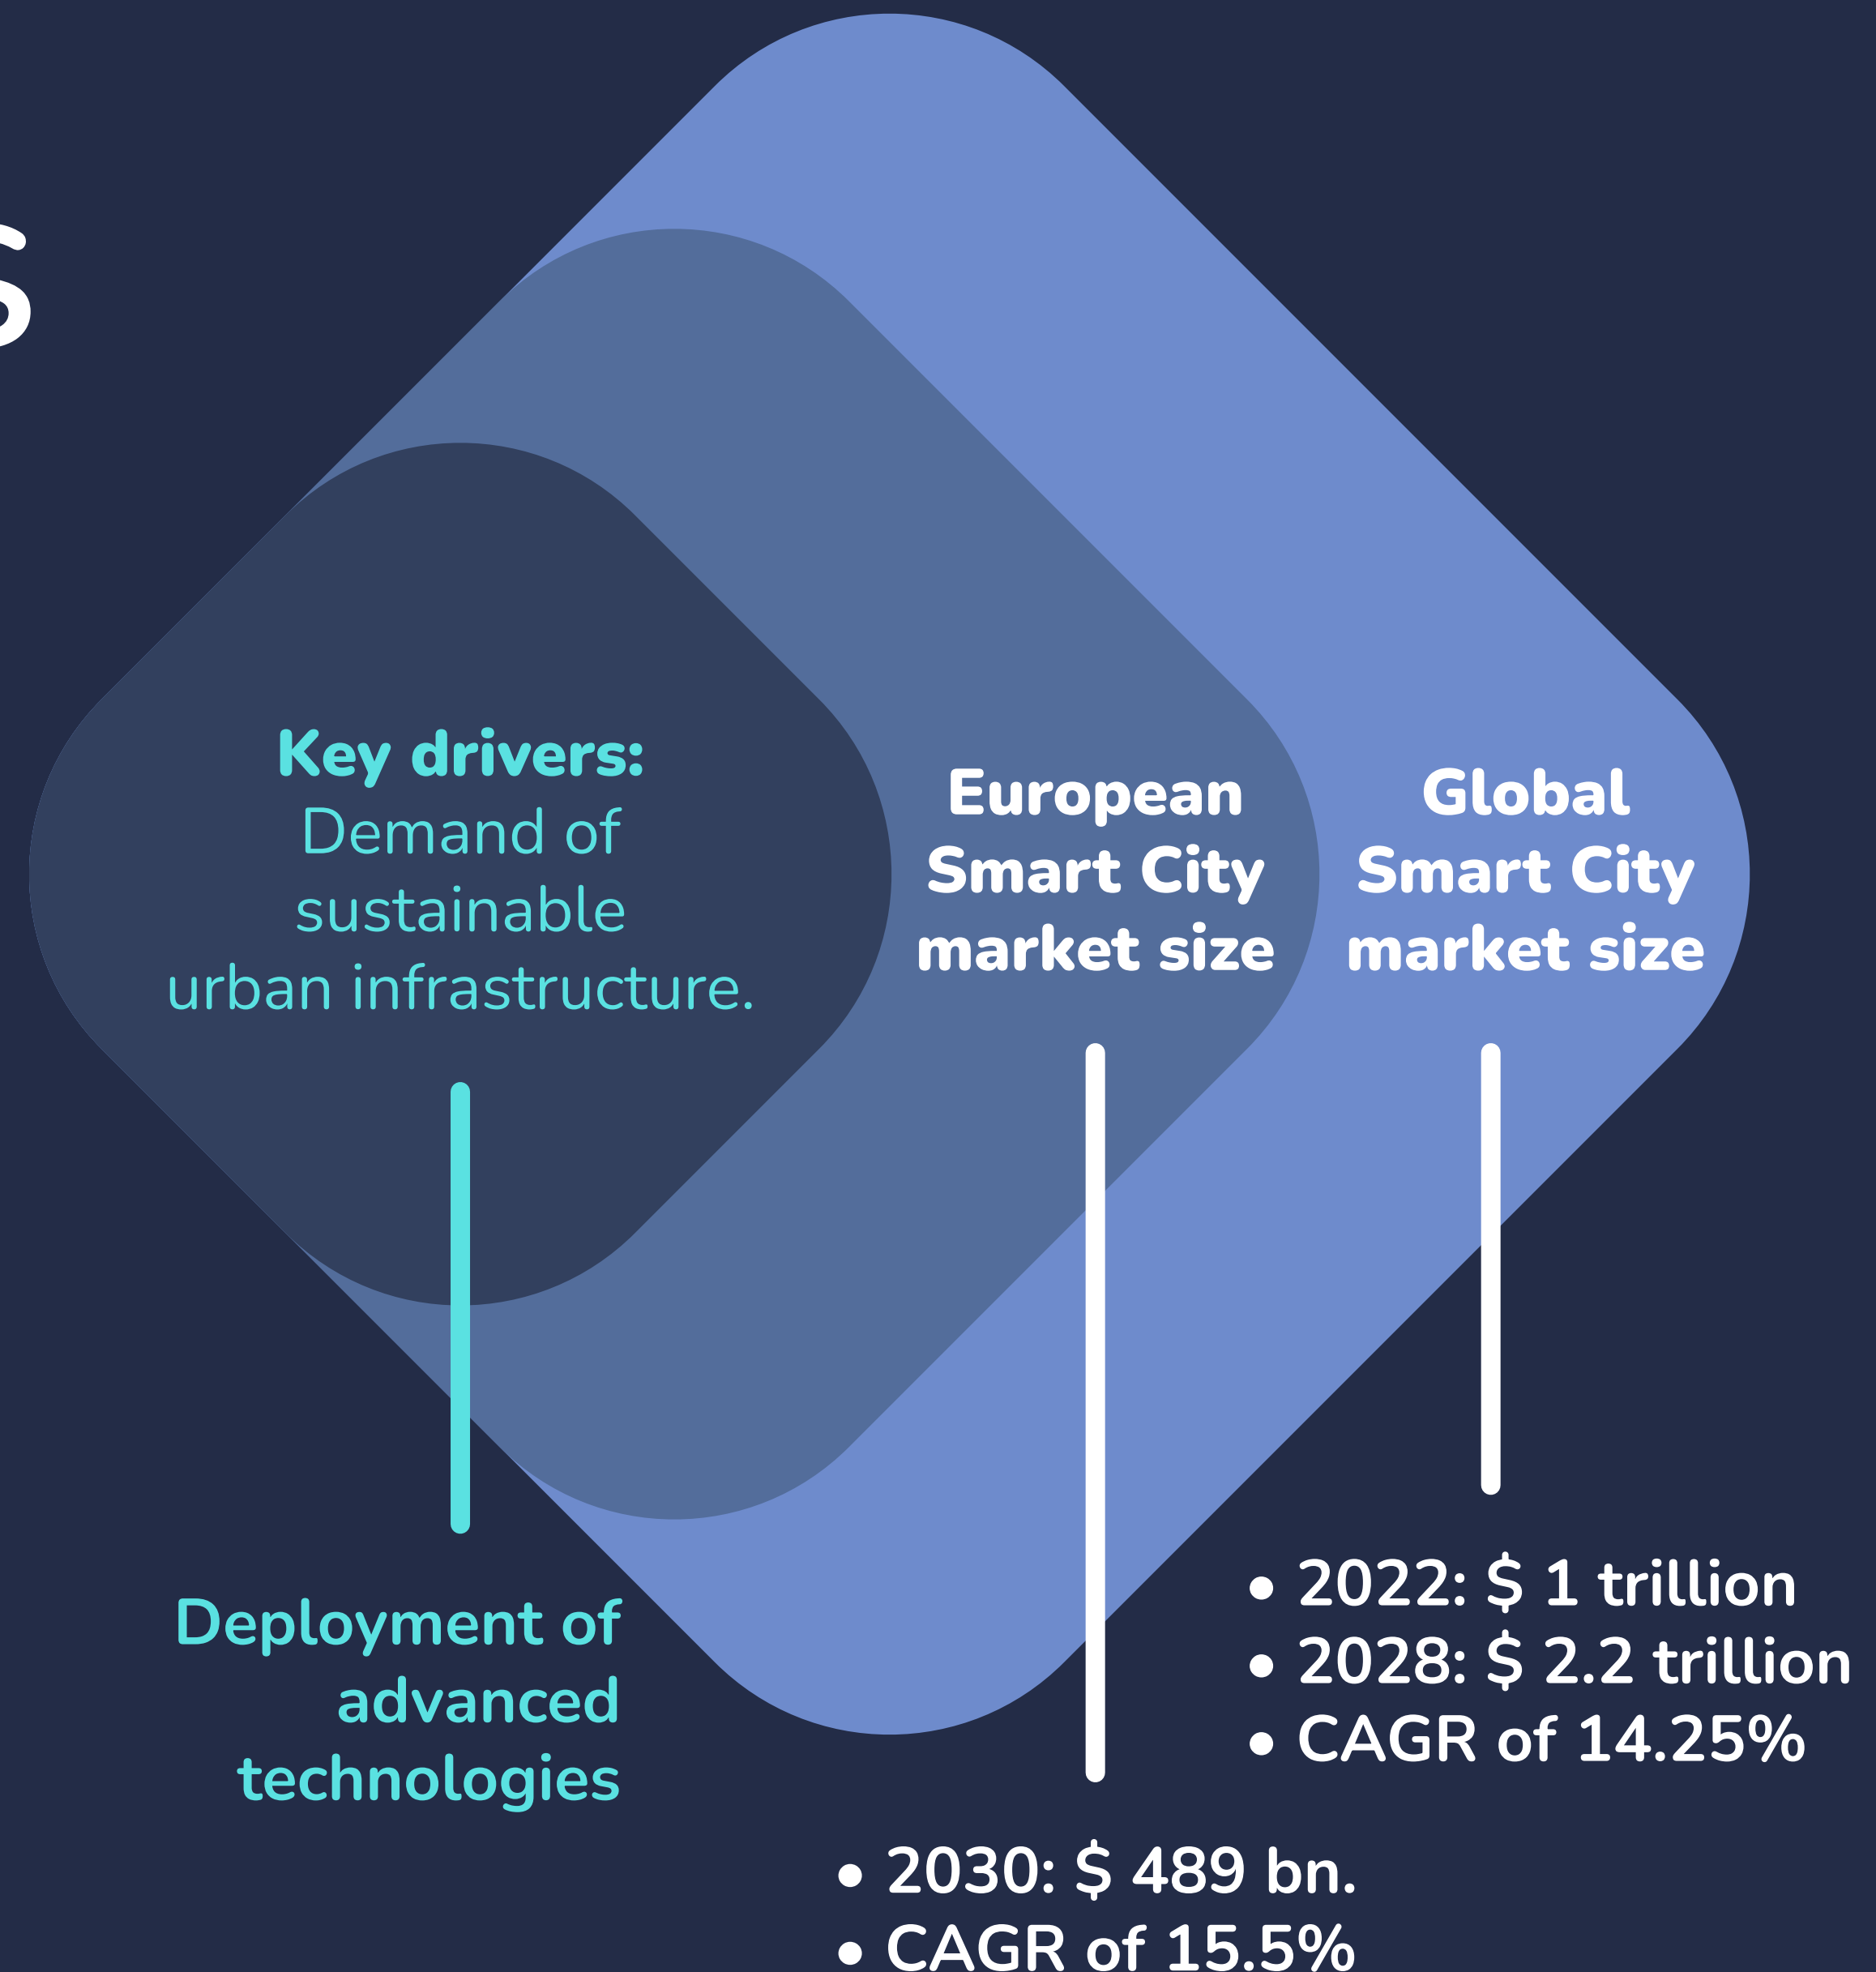

VIVE TEXCELLENCE

New areas of application for textile waste are constantly being sought.

- almost 100% of the composition is secondary raw materials
- resistant to moisture, does not absorb water
- resistant to low temperatures, fungus and mold
- it is much stronger than comparable plastics

PROJECTION / GLOBAL TRENDS

In 10 years, the Smart City market is forecasted to become bigger than the automotive market.

VISION

- New beginnings

- Foxconn, the largest manufacturer in the world, is our new production partner.
It means: even higher quality, higher quantity and 100% EU production.

- Foxconn

- Taiwanese multinational electronics contract manufacturer established in 1974.
- In 2023, the company's annual revenue reached \$222,5 Billion.
- World's largest contract manufacturer of electronics.
- Notable products manufactured by Foxconn: iPhone, iPod, Nintendo, Cisco products, Sony PlayStation, Microsoft Xbox, etc.

- Annual production rate

- Capacity: 3000 smart benches
- 2024 Goal: 1500 benches sold (already pre-orders for 200 smart benches)

- Strong presence on each continent

- Build an even stronger partnership with distributors

UPCOMING PRODUCTS

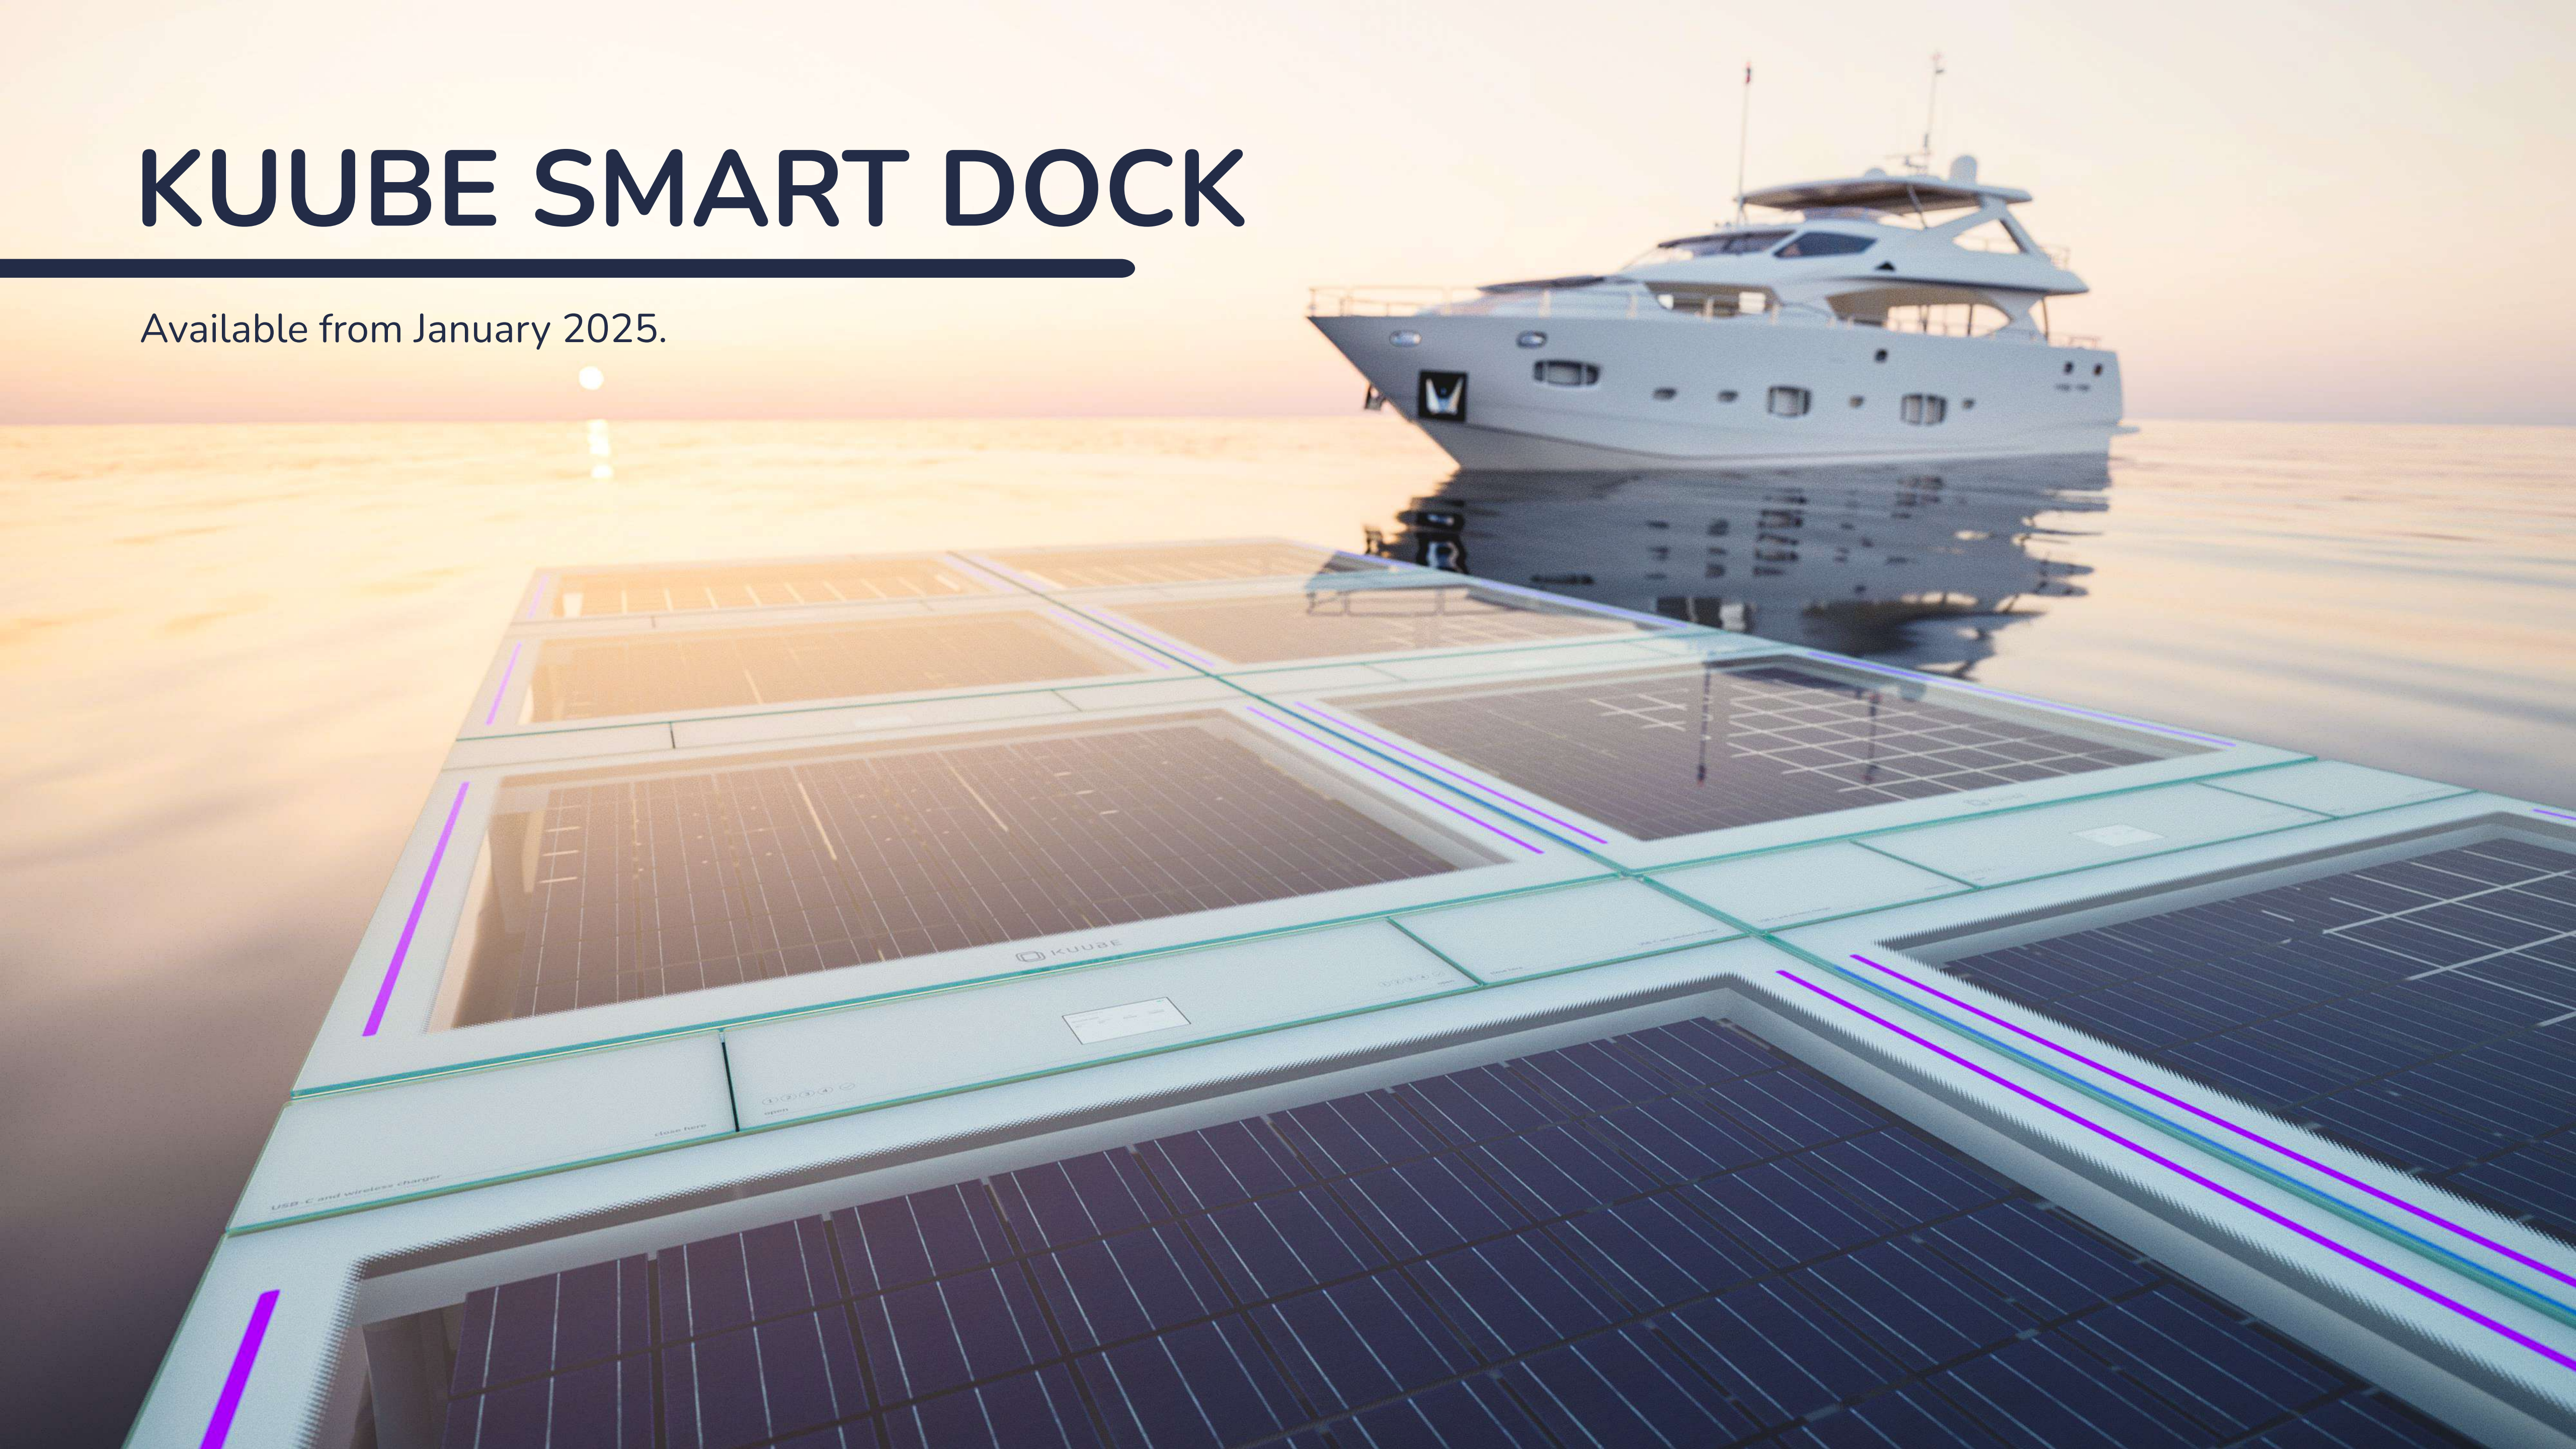

Available from July 2024.

KUUBE STOP

KUUBE SMART DOCK

Available from January 2025.
